

ETAP, vision in lighting

ETAP strives for long-term sustainable business development.

We maintain a sound balance between profit, social values and commitment in the world in which we work and live.

We operate in the high end of the lighting and emergency lighting markets. Through our professional approach, our flexibility and our passion for lighting, we are a preferred and reliable partner for our customers. We create the most appropriate lighting solutions, based on creativity, innovation and close co-operation with our customers.

We want to secure a long-term profit. Our continuous quest for competitive advantages and our high cost awareness serve this purpose. We make sure to create added value for our shareholders, making room for investments and growth.

We rely on our employees' commitment. We support them to continuously improve their competencies and performance, to take on responsibility, and to co-operate actively with all their colleagues. We offer them a challenging job, a safe and pleasant working environment and a sincere social attitude.

We commit ourselves to continuously improve our performance in the safeguarding of the environment we live in. Our lighting solutions are the best in class regarding energy consumption. Our products are durable and built from recyclable materials.

Through high ethical standards, good communication, co-operation and respect we develop a win-win relationship with all our stakeholders.
